

# Synopsis Of 'Home Service Booking'

The on demand home service system is incredibly useful for everyone who are buried up in a heavy work culture, as everyone is engaged with busy schedules, and hectic tasks which make them deviate from family life and want to urge home services like plumbing, electrical maintenance, maid service, cleaning service etc.

WHY? This Home Service System has been developed to override the problems arisen in the mainstream system . So, giving a thought to that aspect of life is to design and develop a system that provides many services at your doorstep in just one click.

## Modules/Scopes Of Our System :

- **Admin Module** : Admin can easily monitor and control the workflow of the system, thus ensures the quality, time schedule and human management.
- **Home Service Provider** : Home service providers have a crucial role within the project he/she can register with this website by mentioning their role and adds.
- **Home Service User** : while the user can see an inventory of home services and get in touch with Service Providers as per their requirements.

## Features Of Our System :

- Dynamic & Interactive(UserService ProviderAdmin) System.
- The web home service project consists of many categories
- A very simple process is carried out to book a service(s)
- Users who are in need of services can register with this website and look for service providers by mentioning the situation.
- System is versatile as service can be booked from everywhere to anywhere you desire.
- To make it comfortable for all the users our system also provides a mobile environment which offers ease in accessing our services.

## Objective :

- Provides variety of services in one platform by just one click.
- No bargaining a labor for home service.
- Reduce the Hassle of the traditional service system such as bargaining, different locations etc.

Users and Service Providers should meet their desires better than traditional system, That's the goal.
